

The Janesville Daily Gazette.

VOLUME 24 Entered at the Post Office at Janesville, Wis., as second-class matter.

There are 250,000 Indians in the United States, and last year they cost the government—not including the expenses of the campaigners against the tribes—over five million dollars.

The Presidential pension fund scheme has been abandoned. The policy to provide for General Grant and not for Hayes, or Garfield, when the latter became ex-Presidents, was an unwise one and did not meet with public favor.

When Ben. Hill proposed to kill the Democratic party provided the Republicans would kill their party, Colonel Bob Ingersoll suggested that to him it was like the proposition of the rooster to the horse, that they should not step on each other's feet.

This comes from the Atlanta (Georgia) Constitution, a Democratic paper, and shows a high appreciation of General Garfield: "We make no mistake in regard to General Garfield's capacity. Since Abraham Lincoln the country has had no President who could at all compare with General Garfield. His mental equipment is perfect, his training exceptional."

Marschal Glynn, of Rockford, has been arrested on the charge of manslaughter, and has been held to bail in the sum of \$3,000, to wait the results of the coroner's inquest. One day last week one Lewis M. Webber went to Rockford and got into a street altercation with Marschal Glynn when the latter struck Webber over the head with his baton, which fell him to the ground, cutting his skull severely. Webber died on Wednesday from the effects of the injury.

General Garfield has been in Washington for a few days arranging some private business. He is in excellent health and spirits, and does not seem to borrow any trouble or anxiety over the burdens which the events of next March will throw upon him. He will get away from Washington as early as possible and before Congress convenes, and for the first time in twenty years will spend the winter in Ohio. While there he was visited by a large number of prominent persons, and among the number were General Sherman and Colonel Ingersoll. Nothing fresh was obtained from him in regard to the formation of his cabinet. Several Southern Republicans called upon him and urged the appointment of a Southern man to a cabinet position; but he gave them no intimation as to what he would do.

Mr. Alpheus S. Foote, a fashionable young man of La Crosse, and formerly a partner of Brick Lomax, has been sentenced to five years in the State prison at Waukesha, on the charge of forgery. The case of Foote is a sad one. Several years ago he married a daughter of James Vincent, a prominent lumberman of that city. He became well known in society on account of the high social position of his wife's family, and by his father-in-law's generosity in giving him money, was enabled to purchase an interest in Pomeroy's Democrat. He was naturally dishonest, and a year ago he forged notes to the amount of \$6,000 or \$8,000, and afterwards tried to fire the Democrat office for the purpose of recovering some insurance. On the charge of forgery he was arrested, and the day before Thanksgiving was sentenced to Waukesha for five years.

Mr. E. W. Conable, editor and proprietor of the Delavan Enterprise, was arrested, on Wednesday last, and taken to Elkhorn, to answer to a charge of criminal libel upon Postmaster Malville, of Delavan. The examination of the case was postponed till the 4th of December. The complaint against Mr. Conable relates among other things that he did, "on the 15th of October, maliciously and wickedly composed, wrote, and printed a scandalous libel concerning Mifflin's official conduct and his administration of the postoffice; that he had repeatedly, persistently, knowingly, and wickedly withheld from subscribers to the Enterprise their copies of that paper, said copies being in his possession and addressed to subscribers." The postmaster at Delavan must labor under the impression that editors are men of large and ample means, and that he has a chance to draw a few thousand from Conable's bank account. But there is a slip between the cup and the lip in these suits against editors. It often happens that when a man who feels himself libeled by a newspaper and sues for \$5,000 or \$20,000 damages, gets six cents and costs.

PROFESSOR WATSON.

Arrival of the Remains at Ann Arbor. ANN ARBOR, Mich., November 25.—The remains of Professor Watson arrived this morning about 9 o'clock the train having been delayed for two hours by an accident. The remains were accompanied by the Professor's wife and aged mother, besides the committee from the Madison University, composed of Regent Carter, Professor King, and George C. Comstock. The remains were immediately conveyed to University Hall, where they have laid in state until 9 o'clock this evening. Streams of people have been passing through the hall all day, and the remains have been viewed to-day by many hundreds. The funeral services to-morrow will be very impressive. The faculty and students will follow the remains to the cemetery on foot. Many prominent men will be present. The following pall-bearers have been selected: Colonel H. S. Dean, the Hon. Ed Kinn, Zina P. King, and L. Gruner, from among our citizens, and Professors Tyler, Oller, Dodge, Green, Frothingham, Petree, Harrington and Kent, from the faculty.

THE ONCLE JOSEPH.

The Collision on the Italian Const. Two Hundred and Fifty Lives Lost.

SPREZZA, Nov. 25.—The steamer Uncle Joseph sank almost immediately after the collision. Two hundred persons are known to be drowned and fifty saved. The fate of the other fifty is at present uncertain. Heartrending scenes followed the collision, as the Uncle Joseph was wanting in means to save the lives of the large number on board. Eye witnesses of the collision say that they cannot satisfactorily explain the manner and cause of the occurrence.

The passenger list of the Uncle Joseph shows a total of 204 persons on board, and the sailors numbered thirty-three. Her cargo consisted of eighty tons of merchandise.

At the roll call of the survivors, thirty-five passengers and thirty sailors only answered to their names. The Captain also perished.

LOXON, Nov. 25.—A dispatch to the Lloyds from Leghorn confirmed the report of the loss of 250 lives by the collision near Spezia. The Uncle Joseph was an iron steamer, of 823 tons gross, and the Ortigia was of 1,853 tons burthen.

LOXON, Nov. 25.—A dispatch from Rome says most of the passengers on the Uncle Joseph were poor emigrants from Calabria. The Ortigia struck the Uncle Joseph amidship while going at full speed, almost cutting her in two, and the Uncle Joseph sank in less than three minutes.

GENERAL GARFIELD.

WASHINGTON, Nov. 25.—General Garfield was invited to attend President Hayes' church, Foundry, Methodist, and in spite of the snowstorm a large crowd assembled to see him. He did not go, however, contrary to expectation, and went to his own Christian church on Vermont avenue. Mrs. Garfield and Congresswoman Townsend accompanied him. After service he made a call upon General Robert Schenck, and remained for over an hour. Early in the morning and in the afternoon quite a number of visitors called, but remained only a short time.

THE SILVER DOLLAR.

Secretary Sherman Will Resume His Recommendations.

WASHINGTON, Nov. 25.—It is now pretty well understood that Secretary Sherman, in his annual report, will take strong grounds against the silver dollar unless an additional number of grains of silver can be put into it, and the present dollar brought to be nearly equal to the billion value of gold. He will undoubtedly take the position that the permanent success of resumption will be imperiled if the present standard dollar is retained with out any modification of the law. He will refer to the fact that the banks and clearing-house decline to receive it on the same basis as they do gold or legal-tender, and that many of them will only take it as a special deposit, while the New York clearing house will receive neither silver nor silver certificates. He will protest that under the operation of the existing law the amount of gold will be constantly reduced, while the stock of silver will be increased in the vaults, and that this condition of things will be unfavorable to the continuance of resumption. He will, in short, reassess all his old views on the subject of the silver dollar, and while admitting that it is in point of law the equal of the gold dollar as a legal tender, he will insist that it ought not to remain equal, and cannot with the present number of grains of silver remain equal, unless it is the intention of congress ultimately to adopt the silver standard.

EXPLANATIONS IN ORDER.

WASHINGTON Nov. 25.—In the excitement of the Presidential campaign several very strong strictures were made by Senators and Representatives belonging to the two parties upon many of the public and private acts of each other. In consequence of these remarks it is anticipated that some unpleasantness may occur when Congress meets. Friends of Mr. Conkling say, for instance, that he is very much aggrieved concerning certain comments made upon his acts by Sena-

for Bayard, and that Mr. Bayard will be called upon for an explanation.

GOVERNOR POUND.

What He Says of the Wisconsin Campaign.

WASHINGTON, D. C., Nov. 25.—Governor Pound, of Wisconsin, who was re-elected to Congress by so largely increased a majority, is here, engaged in that most exasperating business—"hunting partners for the winter." Speaking of the Wisconsin campaign said:

"We had a great success in Wisconsin, and should have succeeded in the Milwaukee district, but for a mistake that was made there. That Congressional district gave General Garfield a hands-me majority; but the Congressional nomination was a mistake, and Duester received the district. All the Republicans in the State were returned by increased majorities. I have not yet received the official figures as to the majority in my district, but it is something over 5,000. This is three and a half times as large as it was two years ago."

"How does the senatorial campaign look in your State?"

"That is a question that it is impossible to determine, and it would be very hazardous to make any predictions concerning it. It is evident that the contest will be very close one. The friends of Hayes and of Sawyer are both very confident. This contest did not have a very beneficial effect upon the National election as it caused the question of methods of the legislature to enter largely into the Presidential election; and in some of the districts, notably in the legislative district in which I live, it caused the Republicans to lose their member. This being discovered, the Sawyer men succeeded in nominating their man in convention; and as the result showed, there being a Democrat and a Greenbacker also in the field, the Democrats succeeded in carrying it. There are reports, however, that he may renounce his party affiliations; but that is doubtful."

"What do you think Congress is likely to do this session?"

"There are many measures that ought to be passed. I shall certainly endeavor to obtain favorable action upon the Reservoir bill, and upon my Constitutional Amendment. The Reservoir bill would have been more successful last year but for the approaching Presidential contest."

"What does your Constitutional Amend-

"In brief, it proposes a six years' term for the President of the United States, making him ineligible for reelection, and provides for a three years' term for Congressmen. There is a very marked sentiment in favor of the Presidential part of the proposition. I consider the recommendation as to the term of congressmen not less important. Under the present system, at the very first session of congress a new member has to decide the question of renomination. His efforts are all directed to that end. The consequence is, that the Congressional Amendment is filled with speeches addressed to the Nominating Convention, rather than to the interests of the district. Under my amendment a Congressman would at least have one session which he could devote to public business and to the study of the great questions before him, without considering how he can be successful at the primaries."

CREMATION.

PITTSBURGH, Pa., Nov. 25.—There was a quiet cremation at Dr. LeMoyne's crematory to-day, the subject being Mrs. Lucia Noyes, wife of C. H. Noyes, Esq., of Warren, Pa., a lawyer. The lady died on the 21st of November, in her 28th year, of childbirth. The body arrived here at 11 o'clock in the forenoon, accompanied by Mr. Noyes, who with his wife, had pledged themselves to cremate the one who died first. There were religious services at the crematory, conducted by the Rev. Dr. Hays, after which the body was removed from the casket and placed in the retort. As soon as the door was closed all took their departure. Nothing could be seen but dense smoke after the remains were placed in the retort. The ashes will be removed to-morrow.

GENERAL GARFIELD.

COMMERCIAL NEWS.

JANESVILLE MARKETS.

Reported for the Gazette by Bump & Gray, Grain and Produce Dealers.

JANESVILLE, November 24.

Receipts of grain have been the largest during the past week, and we see that harvest-bills of barley are averaged over six thousand bushels per day. Wheat is in good demand at \$1.05 cents for winter and \$1.07 cents for spring. Barley is in brisk demand for all grades. Good corn is at 60¢-65 cents, and common to fair quality at 55¢-60 cents.

RYE FLOUR, \$2.25 per sack.

BUCKWHEAT FLOUR, 50¢ per sack.

WHEAT, Winter, Spring, Good to best milling grain, 50¢ per sack.

WHEAT BRAN, 50¢ per 100 lbs.

MEAL, common, 80¢ per bushel, bolted 30¢ per bushel.

FEED, 50¢ to \$1.00 per bushel.

MIDDLE GRAIN, 50¢ to 60¢ per bushel.

RYE, in good regard at 75¢-80¢.

BARLEY, Bright sample at 70¢-75¢ common to fair quality at 65¢-70¢.

CORN, old shell, 4¢ for 60 lbs, 35¢-37¢ new ear 40¢-42¢.

DAISY, white or yellow, mixed 25¢-28¢.

TIMOTHY SEED, in demand at \$1.00-\$1.25 per 100 pounds.

CLOVER SEED, saleable at 80¢-90¢ per bushel.

POTATOES, good demand at 20¢-30¢.

BUTTER, in demand at 90¢-100¢.

BEANS, old 40¢-50¢ per bushel.

EGGS, Square at 15¢-20¢ per dozen fresh.

HIDES, Green, 65¢-75¢ per cwt. skins, Dry, 12¢-14¢.

WOOD, in demand at 50¢-55¢ per bar for fair to choice class, 4¢ off for unseasoned.

SHEEP FELTS, Range at 50¢-60¢ per 25¢ each.

LIVE STOCK, Cattle \$2.50-\$3.00 per 100 lbs. Hog \$1.00-\$1.20 per 100 lbs.

POULTRY, Turkeys for 25¢, Chickens 6¢-7¢.

SHANNON AND EDESON.

In Mr. Shannon's own Comedy Drama.

SHANNON AND EDESON.

At the Grand Opera House, Chico, to crowded and delighted audiences.

ADMISSIONS—25¢. - 50¢. - 75¢.

plate, Double Decks, Slipper Drawers, all complete for \$45.

A fine 7 piece Parlor Suite, Plush Bands, top and bottom, large patent Rockers, for \$55.

Near the middle of Bellhaven Bay and about a quarter of a mile from the place where we were standing, there certainly appeared a long and large black animal in the water, having all the appearance of the saurian described by Dr. Joass. When first observed it was proceeding shoreward, with what seemed to be its head and various undulated portions of the body above the surface. After getting near the shore it turned to the westward, and kept moving about in that position for a considerable time. Sometimes it appeared to stretch itself out to its full length, at which times both its head and tail were seen above water, only a small portion of the middle of the creature being submerged. Most frequently, however, it was the undulations or apparent coils of the body that were observed, two or three of them being occasionally visible at the same time. These coils had all the appearance to the observer, at the distance mentioned above, of the coils or folds of a serpent, the sea and the black masses being distinctly separated. Occasionally the creature seemed to take a header, and disappeared altogether, but it seldom remained longer than two or three minutes beneath the surface, without exposing some part or other of its body. When fully stretched out, as it appeared to be several times during the period of observation, it seemed to be upward of a hundred feet in length, with an apparent breadth of from two to three feet. No doubt the dimensions must have been very much larger. As it was in sight for upward of a quarter of an hour, ample opportunity was afforded for watching its movements. The sea was also as smooth as the surface of a mirror, which contributed very much to assist the observations made by the onlookers. After departing near the shore for the time specified, the long and black creature turned its head to the north, and stood out to sea. Altogether, if the animal was not the great plesiosaur seen by Dr. Joass, he was evidently a near relative of the same family, and his visit to Bellhaven Bay has furnished food for reflection to those who have addressed his gambols for many a day.

The officers and passengers of the steamer Nestor, plying between Manila and Pemang, give the following as their evidence: "At about ten a.m. we were surprised by the appearance of an extraordinary monster going in our course, and at an equal speed with the vessel, at a distance from us of about 600 feet. It had a square head and a dragon black and white striped tail, and an immense body, which was quite fifty feet broad when the monster raised it. The head was about twelve feet broad, and appeared to be occasionally, at the extreme, about six feet above the water. When the head was placed on a level with the water, the body was extended to its utmost limit, to all appearances, and then the body rose out of the water about two feet, and seemed quite fifty feet broad at those times. The long dragon tail with black and white scales afterward rose, with an undulating motion, in which at one time the head at another the body, and eventually the tail, formed, each in its turn, a prominent object above the water. The animal, or whatever it may be called, appeared careless of our close proximity, and went our course for about six miles, on our starboard side, and then finally worked round to our port side, and remained in view, to the delight of all on board for half an hour."

In August of 1845, there was seen here at Merigomish, a marine monster which was estimated about eighty feet long. It was a ground in still water, within two hundred yards of the beach, and after its motions had been watched for about an hour, it succeeded in getting off into deeper water and disappeared. One gentleman mounted a high bank and overlooked it. It raised its head frequently from the water, and its back was either covered with humps or they were caused by the motion of the body. The skin was dark and rough. It uttered about continually, and would bend its body into a circle and unbend it with great rapidity. It soon disappeared, and left a long and wide wake, although no fins could be seen." In 1844 a large creature swam past a wharf at Arising, near the north-east end of Nova Scotia, and was observed by Mr. W. Barry, of Pictou, who certified that he was within twenty-five feet of it, and judged it to be sixty feet long and three feet in width. The back was covered with natural ridges or humps. The body moved in "long undulations," thus causing the head and tail to appear and disappear at intervals. This evidence was all procured by Mr. J. W. Dawson, of Pictou, Nova Scotia, for Sir Charles Lyell, F. R. S., F. G. S. L., etc., a gentleman who is an authority on almost any subject. In February of 1845 a letter was printed in the various newspapers, signed by Captain Lawson, giving a description of a sea-monster seen by him in 1830, at Cape Charles and Cape Sable, when it was stated as once having been on the back were seen three or four. The head was small in proportion to the length. In the month of August of that year and of 1844, articles appeared in New York papers giving a description of a monsterish animal seen by many people, and giving the names of surgeons, lawyers and others who had seen it, and who had certified to the veracity of the statement. The serpent was seen in the vicinity of Christiansand and at Sæt Mølde and Lund. It entered the fjords on calm days, and was supposed to be from seventy to one hundred feet in length, of a black color, smooth and about two feet in circumference. It moved through the water like an eel, and came so near the shore that the waves broke on the beach as if a steamer had passed. On the neck hair was observed, that waved like a mane in the water. Archdeacon Deinott, in his report, says that the people who witnessed this remarkable sight were not frightened, but observed it carefully, and fired shots at it, some of which must have hit, as it dived, but reappeared again.

In the years 1817 and 1820, a large marine animal made its appearance quite frequently on the New England coast, especially between Gloucester and Boston. These visits created so much excitement that the Linnean Society of Boston appointed a committee to investigate the matter. It was done, and Dr. Bigelow and F. C. Gray, two well-known gentlemen of the committee, made the report, of which the following is an extract: "The monster was from eighty to ninety feet long, his head usually carried about two feet above the water; the body of a dark brown color, with thirty or more protuberances—compared by some to four gallon kegs, by others to a string of buoys, and called by some bunches on the back. Motions very rapid—faster than those of a whale—swimming a mile in three minutes, and sometimes more, leaving a wake behind him, chasing mackerel, herrings and other fish, which were seen jumping out of the water fifty at a time, as he approached. He only came to the surface of the sea in calm and bright weather. A skillful marksman fired at him from our boat, and having taken good aim, felt sure he must have hit him on the head. The creature turned

toward him, then dived under the boat and reappeared a hundred yards on the other side.

"Near the middle of Bellhaven Bay and about a quarter of a mile from the place where we were standing, there certainly appeared a long and large black animal in the water, having all the appearance of the saurian described by Dr. Joass. When first observed it was proceeding shoreward, with what seemed to be its head and various undulated portions of the body above the surface. After getting near the shore it turned to the westward, and kept moving about in that position for a considerable time. Sometimes it appeared to stretch itself out to its full length, at which times both its head and tail were seen above water, only a small portion of the middle of the creature being submerged. The animal, or whatever it may be called, appeared careless of our close proximity, and went our course for about six miles, on our starboard side, and then finally worked round to our port side, and remained in view, to the delight of all on board for half an hour."

The officers and passengers of the steamer Nestor, plying between Manila and Pemang, give the following as their evidence: "At about ten a.m. we were surprised by the appearance of an extraordinary monster going in our course, and at an equal speed with the vessel, at a distance from us of about 600 feet. It had a square head and a dragon black and white striped tail, and an immense body, which was quite fifty feet broad when the monster raised it. The head was about twelve feet broad, and appeared to be occasionally, at the extreme, about six feet above the water. When the head was placed on a level with the water, the body was extended to its utmost limit, to all appearances, and then the body rose out of the water about two feet, and seemed quite fifty feet broad at those times. The long dragon tail with black and white scales afterward rose, with an undulating motion, in which at one time the head at another the body, and eventually the tail, formed, each in its turn, a prominent object above the water. The animal, or whatever it may be called, appeared careless of our close proximity, and went our course for about six miles, on our starboard side, and then finally worked round to our port side, and remained in view, to the delight of all on board for half an hour."

MANHOOD RESTORED.

A victim of early impotence, causing nervous debility, premature discharge, etc., having tried every remedy, including the use of all means of self-cure, which will send free to his fellow-subjects. Address A. H. REEVES, 13 Clarendon St., N.Y.

now doubtless

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH T. INMAN, Station, P.O. New York City.

Jan 22nd—dise

Mother! — Mothers! — Mothers!

Are you disturbed at night and broken of your rest by a sick child suffering and crying with the excruciating pain of cutting teeth? If so, go at once and get a bottle of MRS. WINSLOW'S SOOTHING SYRUP. It will relieve the poor little sufferer immediately—depend upon it, there is no mistake about it. There is not a mother on earth who has ever used it who did not tell you at once that it will regulate the bowels, and give rest to the mother, and relief and health to the child, operating like magic. It is perfectly safe to use in all cases, and pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States. Sold everywhere. 25 cents a bottle.
